DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species V in the reply filed on January 24, 2008 is acknowledged. In the response submitted July 28, 2008, applicants have amended claim 1 to recite that the magnetic pieces as being Ni-Zn-Fe-O magnetic material. In view of this amendment, the Examiner now considers that claim 1 is included in the elected claims directed to the Ni-Zn-Fe-O embodiment. Accordingly, the Examiner now considers that claims 1, 9, 20, 26, 50 and 61 read on a shape memory material body comprising a Ni-Zn-Fe-O powder. Applicants in their next response should indicate any additional claims from among product claims 1 to 82 they consider to be encompassed by the elected claims 1, 9, 20, 26, 50 and 61. Applicants are requested to refrain from merely stating that all of claims 1 to 82 now read on the elected Ni-Zn-Fe-O embodiment, but rather are requested to list only those claims that are truly encompassed by the Ni-Zn-Fe-O embodiment. Further, in listing the claims, applicants are requested to make certain that the listed claims do not include duplicate claims or claims that do not further limit the parent claims. For example, compare the limitations of claims 31 and 1, claim 40 and 1, 43 and 2, 44 and 4, 46 and 5, etc.

Double Patenting

2. The nonstatutory provisional double patenting rejection of claims 1, 9, 20, 26, 50 and 61 as being unpatentable over claims 1 to 40 of copending Application No.

10/177,225 has been overcome by the applicants' terminal disclaimer submitted December 1, 2008. It is noted that the Examiner's statement of this rejection as set forth in the Office action mailed November 14, 2008 incorrectly referred to application serial number 10/717,225. In their terminal disclaimer and response submitted December 1, 2008 applicants pointed out this error and correctly submitted a response and a terminal disclaimer correctly referring to serial 10/177,225.

Claim Rejections - 35 USC § 112, First Paragraph

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 9, 26, 50 and 61 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Each of claims 9, 26, 50 and 61 recite that the Ni-Zn-Fe-O magnetic material is a "fluid". It is well known that a fluid is a gas or a liquid (for example, see page 505 of The American Heritage Dictionary of the English Language attached to this action). Applicants' specification does not teach one of ordinary skill in the art how to make a Ni-Zn-Fe-O magnetic material in the form of a gas or liquid nor even if a Ni-Zn-Fe-O magnetic material in the form of a gas or liquid were known how to utilize a gas or liquid

Ni-Zn-Fe-O magnetic material in the claimed invention. For example, how is a Ni-Zn-Fe-O magnetic material in the form of a gas or liquid formed into magnetic pieces as required by independent claim 1 (claim 1, the penultimate line)?
